TRẦN NGUYỄN

FRONTEND DEVELOPER

> ABOUT ME

A Web Developer from Ho Chi Minh City. I'm focusing on expanding my solid experience in Frontend and Single Page App development, also I have a basic knowledge in Backend which I learned from university.

My passion is applying what did I know about technology to build something useful (for me and for everyone). That motivates me to learn new stuffs day by day and to become a Senior Fullstack Developer one day !
